

PROJECT TOPIC SUMMARY

TOPIC NAME: News App

OBJECTIVES:

The objective of this project is to develop a user friendly News app using Flutter that provides real-time, categorized news updates. The app aims to deliver concise news summaries, improve user engagement through personalised content and seamless access to important news, anytime, anywhere.

KEY FEATURES:

1. Real-time News Feed: Displays latest news articles from various sources.
2. Text to Speech: Users will be able to listen to the news article, instead of reading it.
3. Display themes: Night mode and other theme for personalisation as per user preferences.
4. Save later: Users will be able to bookmark specific articles to read them in future.
5. AI-News Summary Generator - Automatically shorten long articles into brief summaries using AI APIs.
